What makes our pizzas special?

We allow our fresh pizza dough to ferment gently over twenty four hours. This slow fermentation imparts additional flavour and improves the texture of the dough. The dough is then hand stretched as opposed to rolled out. It takes longer but hand stretching produces a light airy crust which cannot be achieved by rolling. We then bake our pizzas at almost 800°F directly on the stone to produce an authentic restaurant quality crispy crust base.

Opening times
Friday and Saturday from 4pm until 9.30pm (Last orders)
